## RESOLUTIONS.

WHEREAS, God in His infinite wisdom has seen fit to remove from among us our respected and beloved citizen and town official, Ansel O. Clark, and

WHEREAS, The town of Braintree and the people thereof have lost an honored and faithful servant, be it

RESOLVED, That in his death Braintree loses a most efficient and faithful public official and honorable citizen, one whose example both in public and private life is worthy of emulation. During nearly a quarter of a century of service as Selectman he had always been faithful to the best interests of the town, and in his decease the town has suffered a great loss.

RESOLVED, That in Town Meeting assembled we tender to his family our deepest sympathy in this their great affliction, commending them to Him who "doth not willingly afflict the children of men."

RESOLVED, That a copy of these resolutions be sent to the family of the deceased and that they be spread upon the records of the Town of Braintree.

*Selectmen of Braintree.*

BRAINTREE, Oct. 12, 1903.

The town met in accordance with the foregoing warrant at the time and place specified. The meeting was called to order by the Town Clerk, who read the warrant and the officer's return thereof.

ART. 1. Upon ballot with the use of the check list B. Herbert Woodsum was elected Moderator and sworn by the Town Clerk.

ART. 3. Taken up. Voted to refer the whole matter contained in this Article to the Selectmen with full power to act according to their judgment.

ART. 2. The following motion was offered by Mr. Wallace Wilson and seconded by Mr. Daniel E. Cain : That the Board of Water Commissioners of Braintree be, and they hereby are instructed to forthwith take the necessary steps to provide a sufficient water supply for the residents of Mayflower Park so called, in South Braintree, either directly, by extending the present system to the Holbrook line, or by purchasing such additional water supply from the town of Holbrook. If said Commissioners shall provide such water supply direct from the Braintree water system, they are instructed and directed to raise the stand-pipe and to make any other alterations or additions to any part of the town's water system that may be necessary to increase the pressure sufficient to deliver water in the second story of the residences in said Mayflower Park district.

An amendment to the foregoing motion was offered by Mr. C. C. Mellen : That action be postponed until the next annual meeting. The amendment was rejected.

Upon the original motion sixty-two gentlemen voted in the affirmative and thirteen in the negative and the motion was declared carried.

The following motion was offered by the same gentlemen : That the sum of fourteen thousand dollars [\$14,000] be and hereby is appropriated for the purpose of carrying out the foregoing vote to supply water in the Mayflower Park district, and any part of said sum not needed and used for that purpose shall

be returned to the Town Treasury. Upon this motion 48 gentlemen voted in the affirmative and 11 in the negative. There not being a sufficient number in the affirmative to conform to the Town by-laws the motion was declared rejected.

Voted that the Town Treasurer be, and he hereby is instructed and directed to borrow in behalf of the Town the sum of fourteen thousand dollars [\$14,000] the same to be used to carry out the purpose of the preceding votes of this meeting, viz: To provide a water supply for the Mayflower Park district in said Braintree, and said Town Treasurer is instructed and directed to issue for the money so borrowed ten notes of the town of Braintree, equal in amount, aggregating the aforesaid sum of \$14,000, payable one in each year for ten years; said sums to be raised in each year by taxation, except that any sums appropriated for providing a water supply for Mayflower Park not used for that purpose and returned to the Town Treasury, shall be applied in payment of the note or notes next thereafter maturing. Fifty-two voted in the affirmative and seven in the negative.

Voted to reconsider the vote relating to the appropriation of fourteen thousand dollars [\$14,000], previously decided not in compliance with the by-laws.

Voted that the sum of fourteen thousand dollars [\$14,000] be, and hereby is appropriated for the purpose of carrying out the foregoing vote to supply water in the Mayflower park district, and any part of said sum not needed and used for that purpose shall be returned to the Town Treasury. # Report of the Trustees of the Thayer Public Library.

---

*To the Citizens of the Town of Braintree:*

The Trustees of the Thayer Public Library herewith submit their annual report.

The Library has been open to the public as usual throughout the year. A large number of new books have been added, and as far as possible the desires of the citizens been consulted. We have been put to considerable expense during the past year by making necessary repairs and payment of insurance on the building which fell due this year. Our income amounts to approximately sixteen hundred dollars, and with this income we are supposed to pay salaries, make repairs on the building and books, pay insurance, water and electric light taxes and purchase new books. For several years we have endeavored to keep these expenses down to the lowest amount on the theory that the town was burdened with a heavy tax rate and could afford no more. That theory would seem to have been exploded by the action of the town in appropriating large sums of money for expenditures, which were certainly no more necessary than the proper maintenance of the Library. For several years the Library has been in need of a complete catalogue of the books. We also need more room to work in. The room is there, but will require the expenditure of some few hundred dollars to make it available for Library purposes. We certainly cannot maintain the Library on an appropriation of less than one thousand dollars per year, and consequently must ask the town to

appropriate that amount as has been usual and, in addition to that, we recommend a special appropriation of five hundred dollars to be used in making repairs on the Library building. The matter of cataloguing the books can be left until some future date.

The conditions of the finances and the record of the Library work was shown in the reports of the Treasurer and Librarian, which are herewith submitted.

During the past year we have lost by death, two of the original Board of Trustees, namely Hon. Asa French and Hon. Francis A. Hobart. Under the terms of the gift by Gen. Thayer, these vacancies are to be filled by vote of the Trustees under his will. Acting in this capacity the Trustees appointed Rev. Frederick R. Griffin in the place of Judge French. The position made vacant by the death of Mr. Hobart has not yet been filled.

Respectfully submitted,

(Signed.)

## Report of Board of Health.

---

BRAINTREE, MASS, Dec. 31, 1903.

TO THE CITIZENS OF BRAINTREE:

The Board of Health submit the following report for the year ending Dec. 31, 1903.

There has been no epidemic of contagious disease during the year. There have been no smallpox cases. There were (34) thirty-four cases of diphtheria reported and (3) three deaths:—(22) twenty-two cases of scarlet fever and (4) four deaths:—(5) cases of measles and no deaths; (1) case of cerebro-spinal meningitis and that fatal:—(8) eight cases of typhoid fever reported and (2) two deaths.

The Board have endeavored to keep the many unauthorized dumping grounds clean by providing suitable places to dump refuse and posting notices.

Such a place should be provided by the town on town land in the near future.

The Board wish again to call the attention of the citizens to the need of a system of sewers.

The efficient action of your Board of Water Commissioners has provided an abundant and excellent supply of water for the health of our people much to the gratification of the Board of Health.

Provision has been made to have all offensive material removed from dwellings, etc., by a company possessing an odorless pump and other necessary appliances who have been licensed to do all such work. This does away with the other unsightly and malodorous methods before in use.

The Union schoolhouse has been thoroughly renovated and arranged in a safe and suitable sanitary condition from which no further fear of difficulty can be expected.

The bakeries have been inspected and found to conform to the law.

The barbers have been notified to observe certain rules a copy of which has been provided each.

With as careful management as possible, it has been necessary to exceed the appropriation made last year while doing only that which could in no way be left undone. The Board regrets to say that it has been obliged to omit many things it would like to do for the citizens on account of lack of funds.

The appropriation was (\$100) one hundred dollars and the Board have expended (\$134.92) one hundred and thirty-four dollars and ninety-two cents and there are some outstanding bills not yet presented.

Upon petition, the Board have taken steps to permanently close that part of the cemetery facing the First Congregational Church which is completely filled and which is fully described in our records.

## Report of Fire Department

---

*To the Honorable Board of Selectmen:—*

Gentlemen: I herewith submit my report for the year 1903.

The department was organized with John Kelley, Chief; J. S. Hill, Clerk; C. V. Cottrell, Assistant Engineer; 72 call men.

### HOUSES.

The houses are in good condition with the exception of Hose House No. 2, which needs repairs to sills and floor.

### APPARATUS,

The apparatus is in good condition with the addition of the new hook and ladder truck No 3. The apparatus consists of two hand engines, three hose wagons, three ladder trucks, three hose reels and ten chemical extinguishers.

### HOSE.

The amount of hose has been increased this year about one thousand (1,000) feet of wax treated hose at a cost of \$500.

### ALARMS.

There have been nineteen alarms during the year, three alarms for wood fires and one false alarm. There were six in South Braintree, seven in North Braintree and six in East Braintree. One general alarm and one second alarm.

## LIST OF PROPERTY AND FIRES.

This list can be seen by calling on the Chief of the Board of Engineers.

## RECOMMENDATIONS.

We recommend that the engineers, firemen and stewards receive the same pay as last year with their poll tax. That an appropriation of \$300. be made to repair the three engine houses. That an appropriations of \$500 be made for new hose.

## LOSS BY FIRE.

Value of buildings, \$26,070.00

Value of contents, 15, 550.00

Loss on buildings, 5,659.50

Loss on contents, 1,799.00

Total loss on building and contents, 7,458.50

## CONCLUSION.

In concluding this report I wish to thank Engineers Cottrell and Hill for their hearty support, and the officers and members of the Fire Department for the faithful manner in which they have performed their work.

JOHN KELLEY,

Chief of B. F. D., 1903.

## REPORT OF WATER COMMISSIONERS.

The Board of Water Commissioners submit the following report of the Department for the year ending December 31, 1903.

### APPROPRIATIONS.

The Town appropriated at the Annual Meeting for hydrant service \$4,800 ; for Sinking Funds \$5,120.

### EXTENSION OF MAINS.

Several extensions of the water mains have been made this year, in all cases under the five per cent. agreement.

### SUPPLY OF WATER.

The supply of water remains in the same condition as in the past few years. The Commissioners regret that in order to supply sufficient water they have to operate two pumping stations, a part of the year, thus adding to the operating expenses.

### GENERAL CONDITION.

The general condition of the plant is good ; much of the machinery and considerable of the piping has been in use nearly 15 years and consequently must have depreciated considerably, but by careful usage and occasional renewal of weak parts the plant is doing efficient service.

## REVENUE.

The revenue has been somewhat larger than last year and notwithstanding some extraordinary expenses not strictly belonging to this department, we have at the close of the year quite a large cash balance.

## COLLECTIONS.

Collections still continue to improve, there being a smaller amount uncollected at the end of this year than ever before.

The reports of the Superintendent, Collector, and Treasurer are herewith submitted, giving an itemized statement of their various divisions; also, we have caused to be printed herewith report and recommendations of the Joint Committee on Additional Water Supply, together with the report of the State Board of Health on the same.

## STREET WATERING.

The Department finds the use of water for street watering has been somewhat larger than it was in 1902, the amount of water used in each section as follows:

The South section . . . .	1,739,932	gallons
The North section . . . .	1,883,258	gallons
The East section . . . .	1,709,000	gallons

## HYDRANT CHANGES.

Hydrant in front of B. J. Loring residence, Allen street.

Hydrant in front of Alms House, Union street.

Hydrant in front of Middle street school site.

Hydrant in front of entrance to Paper Mill, Hancock street.

The above hydrants have been replaced with Rensselaer Mfg Co. hydrants, with swing arm attachment for filling street watering carts.

Hydrant on Washington street, Dyer Hill, in front of Thos. Downey residence;

Hydrant on Washington street, Dyer Hill, in front of Alonzo Dyer residence;

Have been discontinued and replaced by Coffin Valve Co. hydrants.

## WATER SUPPLY.

During the past season, we were forced to go to Great Pond for additional water. The temporary pumping station at Great Pond has proved itself valuable as an auxiliary to the Little Pond Plant.

Before starting the pumps at Great Pond, we were obliged to make some extended repairs to the intake pipe as the crib placed there in 1888 by Mr. John Cavanagh, was overturned and broken away from its fastenings by a heavy ice shove.

It was thought best by the Department to place a submerged crib or strainer in the pond, which was done by carrying the suction main out into the pond, thus, enabling us to get water a greater distance from the shore, which has proved itself very much more satisfactory.

### PUMPING STATIONS.

The station at Great Pond has been temporarily repaired to meet its demands.

The slate has been replaced on the main buildings; the coal shed has been repaired with sheet iron sheeting and shingles.

All the woodwork has been painted.

The brick work and foundation have been pointed up.

The superintendent would recommend that all doors and windows of the unused portion of this building be boarded up.

The grounds about the above station have been cleared up to some extent, all in a temporary manner.

### PUMPS.

The pumping machinery is in good condition, both at Little Pond and Great Pond, with the exception of the plunger rods, the pumps having been in use for a number of years without any repairs to the rods mentioned.

### BOILERS.

The boilers are in good condition, both at Little Pond station and Great Pond station. All boilers have been examined by the Hartford Steam Boiler Insurance & Inspection Co., and are insured by them.

It was found necessary the past season to put two new tubes into the boiler at Great Pond.

## HYDRANT REPAIRS.

It has been necessary to make a number of changes in hydrants, taking out the Whittier Machine Co. hydrants and replacing them by others.

Also, we have taken out and repaired a number of leaking hydrants.

## SERVICE REPAIRS.

During the past season, the Department has been obliged to take out and repair a number of the old service connections in the street, which have become rusted out.

Respectfully submitted,

W. E. MAYBURY,

Superintendent.

## Report of the Water Supply Committee

---

At the Annual Meeting of the Town in the year 1900 a committee of six was appointed, known as the Water Supply Committee, consisting of George H. Arnold, E. L. Emerson, E. E. Abercrombie, G. F. Hussey, F. A. Hobart, and G. D. Willis, to act in conjunction with the Board of Water Commissioners, to take into consideration the whole subject of a future water supply and report to the Town at some future time.

That Committee has been continued from time to time up to the present.

On September 19th, 1900, the first meeting of the committee was held and an organization perfected.

At that meeting it was unanimously voted as the sense of the committee that the Town was in need of an additional supply of water.

Many meetings have since been held and much work has been done.

So many propositions were presented and the situation assumed such importance that on January 20th, 1902 the committee passed the following vote :

Voted : To instruct the Water Commissioners to secure the services of a competent engineer or engineers to thoroughly investigate the whole matter of water supply ; carefully consider all plans proposed by the committee, and to suggest any new plan he or they might think best.

Voted : That it is the sense of this Committee that all

plans must be submitted to the State Board of Health before the committee makes its report to the town.

In compliance with the foregoing vote the services of Mr. William Wheeler an engineer of large experience and high reputation were secured.

Mr. Wheeler has thoroughly investigated the whole matter and rendered a report to the committee, said report consists of 62 closely typewritten pages; as it would be very expensive to publish the whole of this report, the committee has thought it best to embody in their own report, the vital points of Mr. Wheeler's report, a copy of said report of Wheeler is on file in the office of the Water Department and will be shown anyone on request.

The subject was considered by Mr. Wheeler under several different heads, as follows:

1. Consumption of water in Braintree and adequacy of present sources of supply.

2. Relations of Braintree, Randolph and Holbrook to each other with reference to the use of the waters of Great Pond.

3. Plans and cost of works for utilizing the waters of Great Pond.

First—Exclusively and independently of Little Pond;

Second—In addition to Little Pond but through a separate pumping station.

Third—In addition to Little Pond and through the same pumping station.

4. Filtration of the waters of Great and Little Pond both separately and together.

5. Admission to the Metropolitan system and cost of Metropolitan water supply for Braintree.

6. Comparative cost of future water supply by each of the several plans and methods referred to.

## VII—RECAPITULATION AND CONCLUSIONS.

1. The present consumption of water in Braintree has

probably fully reached the average available yield of the Little Pond water shed, and certainly exceeds the supply available from that source in the driest period,—which is estimated to be about 435,000 gallons per day, with five feet in depth of storage.

2. The supply available from Great Pond during the driest period, with eight feet in depth of storage below present high water level, is estimated at 2,161,000 gallons per day; and with the additional storage that would be afforded by raising the pond four feet, the dry weather yield would be about 2,703,000 gallons per day,

3. Hence if the use of the water of Great Pond by any town be limited to one-third of the supply, then the quantity available from both sources for Braintree's use during the driest period, would range from 1,155,000 gallons, daily with the high water level of Great Pond unchanged, to 1,336,000 gallons daily, with Great Pond raised four feet.

4. If, however, the waters of Great Pond be used in common by Braintree, Randolph and Holbrook, according to their several needs, until the requirements of all of them shall reach the available dry weather supply, then the quantity available to Braintree from both sources would in the meantime be much greater.

Assuming that the population of Braintree will increase 25 per cent. in each ten years from 1900, with an average daily use per capita of 80 gallons, and that the population of Randolph and Holbrook will increase 20 per cent. each in ten years with a daily consumption of 70 gallons per capita, the dry weather supply available from both ponds will provide for the requirements of the three towns until 1950, without raising Great Pond, and until 1960, by raising it four feet.

5. The use of Great Pond, either as the sole source of supply for Braintree, or in addition to Little Pond, would be more economically and advantageously accomplished through the pumping station at Little Pond than by the reconstruction, completion and equipment of the abandoned works at Great Pond.

6. Likewise, the filtration of the waters of Great Pond whether used as the sole, or as an additional supply, may be more economically accomplished at Little Pond than at Great Pond.

7. The estimates of the construction cost of the additional supply works and plant that would be required to pump and also to filter the water of Great Pond, either locally, or at the Little Pond station, respectively, are as follows:

A. FOR SUPPLY WORKS AT GREAT POND.

Completing and equipping Pumping Station and completing forcemain	\$30,215 78
Slow Sand Filters, covered . . . .	45,000 00
	<hr/>
Total . . . . .	\$75,215 78

B. FOR SUPPLY WORKS AT LITTLE POND.

Conduit Great Pond to Little Pond Station . . . . .	\$25,925 60
Additional Pumping Engine . . . .	7,820 00
	<hr/>
	\$33,745 60
Slow Sand Filters, covered . . . .	37,500 00
	<hr/>
Total . . . . .	\$71,245 60

8. The estimated amount of the investment and construction outlay that would be required to obtain a supply from the Metropolitan Water System is as follows:

Pumping Station at the Quincy-Braintree line . . . . .	\$30,000 00
Forcemain from Pumping Station to corner of Washington and Elm Streets . .	6,800 00
	<hr/>
	\$36,800 00
Admission to the Metropolitan Water District . . . . .	35,000 00
	<hr/>
Total . . . . .	71,800 00

9. The *annual cost* of water supplied in the mains of the Town, as estimated by each of the methods described, would be as follows :—

CONDITIONS OF SUPPLY.		Works at Lit- tle Pond.	Works at Great Pond.	Metropolitan Supply 1904.
1. TRIPLE EXPANSION ENGINE.

	“ filtered “	2,355 50	2,630 50	
	Total	\$7,523 78	\$8,694 56	unknown

10. The total *cost per million gallons* of water filtered and placed in the mains, as estimated, would be as follows :—

	Works at Lit- tle Pond.	Works at Great Pond.	Metropolitan Supply 1904.
A. 600,000 gals. supplied daily,	\$28 13	\$32 82	\$63 25
B. 800,000 “ “	23 17	27 08	unknown
C. 800,000 “ “	23 49	27 19	“
D. 1,000,000 “ “	20 60	23 81	“

In conclusion, as between the sanitary protection and the further development and utilization of one or both of the sources of supply which the town now has at its disposal and in actual use, and the abandonment thereof for a supply from the Metropolitan Water System, it seems clear that sanitary conditions, economy of service, and the non-dependence of the town upon external conditions affecting its water service, all point to the policy of retaining the supplies now in hand, and making for such protection, development and improvement thereof as the highest considerations of good service may require.

For the further development and utilization of the sources already possessed by the town, it is likewise clear that considerations of accessibility and convenience, the ultimate amount of money required to be invested, economy in annual fixed charges and operating expenses, and facility for conserving and using the waters of either or both ponds, all point to the continued maintenance at Little Pond of the pumping station, for pumping the entire supply, and the establishment therein due time,—according to the water to be used and the sanitary condition thereof,—of a covered slow sand filter plant.

The first work required to carry this plan into effect would be the construction of the conduit from Great Pond to the Little Pond station, to be immediately followed by the temporary discontinuance of the use of Little Pond. The larger pumping engine proposed should as a measure of economy, as well as of security in maintaining the supply, be installed at the same time. The town can then deal with the sanitary protection and improvement of Little Pond and the question of filtration at such times and in such manner as conditions then existing may require.

Respectfully submitted,

WILLIAM WHEELER.

Boston, February 24, 1903.

Your committee after a careful consideration of the report of its engineer, voted to recommend the following:

That the Town, at once, cause the waters of Great Pond to be brought down to our *present filter gallery* by gravity as suggested by Mr. Wheeler and appropriate the sum of \$26,000 dollars for that purpose.

The committee also voted to recommend that the town make an appropriation, the amount to be determined by the Town, for the commencement of a system of meters, to be established under the direction of the Water Commissioners.

Respectfully submitted,

JAMES T. STEVENS,

Chairman of the Committee.

## REPORT OF STATE BOARD OF HEALTH.

---

Braintree, April 1, 1903.

TO THE HONORABLE STATE BOARD OF HEALTH,  
STATE HOUSE, BOSTON, MASS.

GENTLEMEN—At the request of the Special Committee on Water Supply for the Town of Braintree, acting jointly with the Water Commissioners of said Town, I respectfully submit herewith for such consideration and advice as is appropriate under the duties imposed upon you by the State, a report upon an additional and improved water supply for the Town of Braintree by William Wheeler, Civil Engineer, together with a report and recommendations thereon which the Special Committee propose to submit to the Town at an early meeting.

You will observe by this report that the Committee recommend entering upon the first step toward procuring an additional and improved water supply recommended by Mr. Wheeler.

JAMES T. STEVENS,  
Chairman of Committee.

## REPLY OF THE STATE BOARD OF HEALTH.

OFFICE OF THE STATE BOARD  
OF HEALTH, STATE HOUSE,

BOSTON, MASS., May 7, 1903.

To the Water Supply Committee of the Town of Braintree  
Mr. James T. Stevens, Chairman.

GENTLEMEN :—

The State Board of Health received from you on April 1, 1903, an application for advice relative to an additional and improved water supply for the Town of Braintree, accompanied

by a report of your committee and of your engineer, Mr. William Wheeler, of Boston, containing the results of investigations of the various sources available to the town and estimates of the cost of an additional water supply by several plans, including a supply from Great Pond in Randolph and Braintree, either alone or in connection with your other sources, and a supply from the Metropolitan water district.

In response to your application the Board has caused the sources available for the supply of the town to be examined by its engineer, and has carefully considered the results of previous investigations of these sources and the reports and information submitted by your committee.

Experience with the filter gallery and wells near Little Pond has already shown clearly that they are incapable of supplying a sufficient quantity of water for the needs of the town in the drier parts of the year and, even if water should be drawn directly from Little Pond, the yield of the works would still be insufficient for the town in a dry period.

The Board has already, in previous communications, called attention to the serious pollution of Little Pond from the large population on its watershed and to the danger of using this pond as a source of domestic water supply without purifying the water. The water of the filter gallery and tubular wells is also affected by the large quantity of sewage discharged into the ground from the population adjacent to the pond on the side upon which these works are located and by imperfectly filtered pond water and, as you have already been advised, while this water may not at present be unsafe for drinking, the circumstances attending its pollution are such that it is liable to become unsafe at any time.

Great Pond, the source of water supply now used by the towns of Randolph and Holbrook, is also available as a source of supply for Braintree, and it appears that the three towns have rights to equal shares of its waters. This pond is situated at such an elevation that it is practicable to draw water from it to your present pumping station by gravity, and it is probable that the source is capable of furnishing a sufficient

supply of water for Braintree for the next 20 years or more, allowing for a reasonable growth in population and in the use of water and for the quantity of water which may be diverted by the towns of Randolph and Holbrook.

The watershed of Great Pond contains much of the thickly populated portion of the town of Randolph, and when the pond was first proposed as a source of water supply for Randolph and Holbrook this Board advised that measures be taken for removing pollution from the pond by the construction of sewers to remove the sewage from thickly settled areas, but no sewers or works for preventing the pollution of the waters appear to have been constructed as yet. There are also several sources of pollution in the immediate neighborhood of the pond.

The water of the pond at times is quite highly colored and contains a large amount of organic matter, due to the presence of microscopic organisms in considerable numbers and to the contact of the water with vegetable matter in swamps on its watershed and to the character of the pond itself, which is shallow with a muddy bottom over a large area. Owing to these conditions the water of this pond, if used directly for the supply of the town, would be at times objectionable for drinking and for other domestic purposes on account of a disagreeable taste and odor and might also be injurious to health unless adequate provision should be made to prevent its pollution by the population on its watershed. The water can undoubtedly be efficiently purified by filtration so that it would be safe for drinking and free from objectionable taste and odor, and it appears from the information furnished you that it is practicable to locate suitable filters near your pumping station and to filter the water from Great Pond by gravity at this place.

By taking a supply of water from the Metropolitan water supply district, an ample supply of good water could be obtained for Braintree, but the cost of a supply from this source judging from the information available to the Board, would probably be much greater at the present time than the cost of taking water from Great Pond and purifying it by filtration near your present pumping station, and there would be no ad-

vantage in the quality of the water of the Metropolitan district over the filtered water if the water filtration works were properly constructed and maintained

Considering all the circumstances the Board is of the opinion that the best plan for enlarging and improving the water supply of Braintree is to take water from Great Pond in Randolph and Braintree and convey it to the neighborhood of your present pumping station and there purify it by filtration. Provision can be made also for drawing water from Little Pond, if necessary, since this water would be suitable for the purpose after filtration but, on account of the necessity for pumping, the cost of using water from this source would be greater than the cost of the water from Great Pond.

It is very important also that suitable provision be made for preventing, so far as practicable, all pollution of Great Pond, and if Little Pond is to be used as a source of supply or the filter gallery near it, a sewerage system should be provided for removing the sewage from the neighborhood of this pond.

By order of the Board,

SAMUEL W. ABBOTT,

Secretary.

It was further voted that the committee submit as its estimate of the financial needs of the schools for the coming year, the following:

Teachers, (in addition to school fund and dog tax) . . . . .	\$19,500 00
Janitors . . . . .	2,280 00
Superintendent . . . . .	1,600 00
Text books and supplies . . . . .	1,800 00
Incidentals for schools . . . . .	550 00
Incidentals and repairs for schoolhouses	1,000 00
Fuel . . . . .	1,700 00
Conveyance of Pupils . . . . .	1,200 00
Repairs on furnaces of Monatiquot Build- ing . . . . .	400 00

In the above financial statement, we would call attention to the item of fuel, the appropriation for which is apparently overdrawn, and at the same time refer the reader to the last year's statement. Of the appropriation of \$1,600 for 1902, only \$260.66 was expended before the end of the year, leaving an unexpended balance, \$1,339.34. This was reappropriated, and a new appropriation of 460.66 added. During the winter it was necessary to purchase coal at very high prices, so that by June, 1903, a large part of this sum had been expended. Notwithstanding this, the committee deemed it the wiser plan to call for bids as usual and buy the year's supply of fuel when coal was cheapest. This was done and the usual supply was purchased at reasonable prices. The cost of fuel for the two years is \$260.66 plus \$2,997.57 or \$3,258.23 or \$1,629.12 per year, or about the average expenditure.

The committee considers that Braintree was extremely fortunate in this regard, as in most towns and cities in the State, the cost of fuel was very much above the average; in many cases from 25 per cent to 50 per cent. Much credit for this economy is due the janitors of the large buildings for their intelligent management of the heating apparatus, and their care in the saving of fuel.

The overdraft in the schoolhouse account was caused by the giving out of the boiler tubes in the Jonas Perkins school, and by the necessity of a new service pipe for the same building.

In the conveyance of pupils account, the apparent overdraft would be \$225 less \$196 or \$29, but as car tickets to the value of between \$50 and \$60 were left on hand Dec. 31st there was really a balance in this account.

The most pressing question at the present time is that of school accommodations. This is the same old problem only perhaps in a new form. Three or four years ago it confronted the committee, and was solved temporarily by having fitted up for use two rooms on the third floor of the Monatiquot building. These proved entirely unsatisfactory on account of poor light,

difficulty in heating, and also on account of the danger in case of fire. Accordingly it was decided during the fall term that their use for class purposes should be discontinued. To provide for the two schools it was arranged that one room be made to do service for the two lowest grade schools at the Pond and Union buildings by having each attend only one session a day, the second grade attending from 8.45 to 12, the first from 12.30 to 3.30. The teacher of the first grade, during the morning, assists the second grade teacher, giving especial attention to pupils who are slower or more backward in learning, and in the afternoon the second grade teacher renders the same assistance to the teacher of the first grade. By this plan the children are confined for a shorter time, but are kept more actively employed, and by having the attention of two teachers instead of one more attention can be given to the needs of individuals. So far as we have gone the pupils do not seem to have lost, but rather to have gained. In Everett where the same plan has been tried both teachers and superintendent are enthusiastic in its praise, claiming that pupils are better fitted for promotion at the end of the year, and that a smaller proportion of a class fail to reach the standard of promotion than under the old system.

This plan was adopted because of lack of accommodations, and is working well in these two grades, but it will be necessary to extend it to grades higher in the course or else provide more room, and it devolves upon the town to decide which course the committee shall pursue.

If the latter course is adopted the most feasible plan is that a new nine-room building be at once erected to take the place of the present Pond school, and on the same site. This would furnish accommodations for South Braintree for a number of years, and in the near future a similar building should replace the present Union school to accommodate the Braintree children. This plan provides for the future as well as for the present, and places the schools near the centres of school population. The present Monatiquot grammar school, situated midway between Braintree and South Braintree, is not convenient for the children of either village.

The carrying out of this plan would leave the Monatiquot building for the exclusive use of the high school. This is greatly to be desired, for the school now has an enrollment of 157 with an average membership of about 140, and in a few years at its present rate of growth the membership will have gone above 200, and the building was not intended to accommodate more than from 200 to 240 pupils.

There have been few changes in our teaching force during the year and since the schools opened in September, no break has occurred. This means very much for the success of the schools, for a change means a serious loss of time and work even though it be possible to have a successor begin at once. Before her real work can begin, she must establish a bond of sympathy between herself and the individual members of her class, and at the same time, get into touch with the system so that her work may begin as nearly as possible where her predecessor left off. If the system were mechanical, this would mean merely the turning of a page in a book, but in practice, it means finding out what the pupils do know and what they do not, and to do this, takes time and careful study. Whenever a teacher has resigned, all possible care and effort have been exerted to get a successor who would be even stronger than the retiring teacher. To do this, it has been necessary at times, to pay to the new teacher a somewhat larger salary than that previously paid. The aim, in choosing teachers, has been to get young women with broad education, well trained in the art of teaching, and who have had two or more years of successful experience in the grade of work they are to perform with us. Combined with these qualifications, there must be a good moral character, and a knowledge and appreciation of the institutions and aims of the Commonwealth and nation. No question as to whether a young woman is a native of the town or not, can be allowed to exert any influence. The schools must be run for the benefit of the pupils and not to furnish employment for any class of people. Only the best teachers to be secured with the salary at our disposal, should be employed. The grand aim of our schools, is to fit boys and girls for citizenship, and no teacher

lacking any one of the qualifications above stated, can properly perform her share of this task. School authorities in other place, are looking for young women possessing the qualifications named and keep increasing the salaries of those whom they find possessing them. If Braintree would have her schools on the same level she must do the same thing to hold those now in her employ and to secure others to take their places should they resign. This, together with the constant increase in the number of teachers, necessitates a constant increase in the annual expenditures. During the year some of our teachers have been offered a very material increase in salary to go elsewhere, but their interest in the schools has kept them with us. Such loyalty should be appreciated and rewarded by something nearly as much salary as they would have received by moving.

The committee during the past year discontinued the system of training in the schools. The state is spending a large sum of money each year for the support of normal schools for the training of teachers, and this town has a right to expect that at least, the great majority of its teachers shall have had the preparation for their work that these schools give. No town, by any training system, can possibly give a training that would at all compare with that given by a normal school. It was therefore decided by the committee that an injustice was being done both the young women and the schools, by the continuance of the system.

The general work of the schools has been very successful during the year. The high school, under the present management and with its present corps of teachers, is doing superior work in every department. The teachers are working in harmony, and with honest, whole-souled devotion are laboring to build up a school spirit and a pride in the reputation of the school and its work. The success of their efforts is showing itself in the increased interest taken by the pupils in their work, in the large number who continue in the school, and further, in the quality of the work done. There are few, if any, towns of the same size in the state, with a better high school, a better corps of teachers, with better attendance or doing better work than

the Braintree high school. The same honest endeavor is shown in the work of the primary and grammar schools all over the town.

Few changes in the course of study have been made during the year, the most important being the substitution of a strong course in English language and grammar for Latin in seventh and eighth grades. This more careful study of our own language gives a better preparation for the study of languages in the high school than the imperfect knowledge of Latin possibly could. It also gives a much better practical knowledge of English to those who do not enter the high school.

Good progress has been made in the special subjects. The individual method in singing introduced this year is working well. The children have already seen the improvement in their own individual work, and are showing more interest as their ability increases. The chorus work is showing marked improvement as a result of the improvement in the individual, each pupil is learning to do his part with confidence.

This last year a change was made in the grammar school graduations. Instead of exercises in each school, conducted by the children, union exercises were held in the town hall, the features of which were singing by the combined schools and an address by some good speaker. This was a decided improvement over the old way for it relieves both teachers and pupils of a large part of the stress and worry connected with the preparation for such exercises at a time of the year when they are least able to undergo them.

I again express the hope that the time is not far distant when Sloyd, or manual training in some form, shall be an essential part of the course of every grammar school and of the high school as well. In his recent address to the General Court of the state Gov. Bates says, "The first duty of every educational board, state or municipal, should be to make certain that the youth under it are educated in the essentials that will make them self-supporting, effective men and women." Without some form of manual training this cannot be done. By far the largest number of the boys and girls who go out from

our schools must take up some form of manual work. There is, and should be no shame in this. Honest, intelligent labor of whatever kind is enobling and elevating if properly performed. Very many boys in our schools have a natural bent for mechanics in some form. Only one of our grammar schools is doing its proper work for this large class of pupils. I believe that the solution of most of our problems of labor and capital and also many of our problems of morality and the prevention of crime lies along this line. It is the young man who has learned to look upon labor as a thing to be shunned who becomes a criminal.

I desire to express my gratitude for the loyal support given me by the committee and the co-operation of the teachers.

Respectfully,

J. A. MACDOUGALL,

Superintendent of Schools.
